SUMMARY

I'm a quick and keen observer. Proficient in HTML5, CSS3, Bootstrap and modern frontend frameworks like ASP.NETCORE and Ruby on Rails.

EXPERIENCE

Frontend Developer

Tech Terrain

📅 07/2022 - 08/2022

Tech Terrain targets the local industry problems and provides an automated solution to resolve these problems.

- Worked on ASP.NETCORE along with SQL server for two months, contributing to the frontend development of the web application.
- Utilized markup languages like HTML and CSS to create user-friendly web pages.
- Developed new user-facing features, determined the structure and design of web pages, built reusable codes, optimized page-loading times and used a variety of markup languages to create web pages.

PROJECTS

Online Attendance System

I worked on ASP .NETCORE along with SQL Server Management Studio for 4 months. I contributed to the frontend development of Attendance summary webpage by using Html and CSS.

Online Pet Shop and Vet Consultancy Final Year Project (Ruby on Rails)

I have developed a full stack comprehensive module of a pet shop on **Ruby on Rails** to enhance operations.

Led the development and implementation of custom accessories, cart and checkout modules along with the home screen. Created the module, ensuring it met the requirements.

Personal Web Development Projects

I have designed and developed two responsive websites using HTML, CSS, JavaScript and Bootstrap effectively implementing modern design principles and ensuring seamless user experience across various devices. I have created an engaging and user-friendly platform and employed responsive design techniques to guarantee optimal functionality on both desktop and mobile devices.
